---

1st: if i use this menu module i have error in IE8 - site is working but why is error?  
error like: "object does not support this property or method"

2nd: need to make for example 13 links on this menu... and to do it need to ctrl+c ctrl+v in 2 files(xml+php) and its very bad(( need to do it in module!

3rd: i upload png's in 128-128 but when it is stable (not when mouse on it) it has got very bad quality... how to improve it?
